## Program Perspective

Many industrial operations and processes involve in the use of lifting machinery, lifting tackles and pressure vessels. The condition of these equipments and the manner of their use, have great influence on the efficiency of the operations and processes. Faulty selection, inadequate strength, patent defects, poor operating practices are some of the significant causes for failure of these equipments, some of which result in fatal or serious injuries and damage to equipment, material or other facilities. To avert such unwanted events, it is essential that users of these equipments are familiar with the various requirements relating to the design, construction, testing and examination, maintenance and safe operation of the equipment.

These equipments are to be periodically examined and tested as prescribed under Sections 28, 29 & 31 of the Factories Act, 1948 and Rules 61, 62, 63, 64 and 65 of the Karnataka Factories Rules 1969. This program is being organized to provide detailed information of the requirements relating to testing and examination, inspection, maintenance and use of the above equipment.

## Topics Highlights

- Statutory requirements under The Factories Act, 1948 and The Karnataka Factories Rules, 1969.
- Testing and Examination of E.O.T. Cranes, Jib Cranes and Mobile Cranes.
- Safety in the use of Lifting Tackles (ropes, chains, slings etc.)
- Safety in the use of Fork Lift Trucks.
- Safety of Lifts and Hoists.
- Safety in the design of Pressure Vessels
- Non Destructive Testing of Pressure vessels.

## Participants

This is a specialized training formulated for Competent Persons, Planning Engineers, Production Engineers, Maintenance Engineers, Methods Engineers, Safety Officers and Middle Management Personnel.

## Faculty

Experts from Directorate of Factories, National Safety Council - Karnataka Chapter and from Industries.

## Certificate

Certificate will be issued to the participant at the end of program.
