

One-day Seminar

SAFE WORKING AT HEIGHT & SAFETY IN CONFINED SPACES

kirloskar
Ferrous

Conducted by **National Safety Council, Karnataka Chapter**

In Association with **Kirloskar Ferrous Industries Ltd.**

Supported by **Karam Safety** 

The objective of this seminar is to provide participants with a comprehensive understanding of safe working at height and safety in confined spaces. By the end of the seminar, participants will be able to recognize the hazards associated with jobs carried out at heights and in the confined spaces at the industries and to develop strategies to overcome the hazards for safe working. Participants will gain practical insights and tools to promote a pro-active safety mindset, improve safe behavior and create a safer work environment for all the employees.

Prior registration is mandatory to participate in this program.

According to statistics, falls from height and suffocation in confined spaces are leading causes of work place fatalities and serious injuries.

Working at height and in confined spaces are high risk activities which require careful planning and execution to prevent accidents and injuries.

Therefore, it is important that we take all necessary precautions to ensure that all employees, contract workmen and other stake holders are protected from the risks associated with working at height and working in confined spaces.

Attend this seminar and discover the power of Safe working culture
