Program Perspective

The use of electricity has become universal. Electricity though a good servant, may prove hazardous if due care is not exercised. Statistics show large number of all the electrical accidents result in fatality indicating it's potential of severity. Although safety is always kept in view while manufacturing electrical equipments, any error in the selection and installation, improper maintenance and ignoring the safety precautions during their use, may lead to accidents.

Recent amendments in CEA Regulations-2023 have incorporated many safety features with enactment of Electricity Act 2003.

National Safety Council, Karnataka Chapter is organizing this training to highlight the regulations and best practices on electrical safety and necessary precautions to be taken so that the accidents due to electrical hazards could be reduced.

Topics Highlights

- Electrical Safety - introduction.
- Safety Requirements under Central Electricity Authority (Measures relating to Safety & Electric Supply) Regulations 2023.
- Electrical Fires-Causes and Control
- Safety Procedures in Electrical Maintenance Works.

- Safety Features of Electrical Controls and Switch Gears.
- Electrical Equipments in Hazardous Locations.
- Static Electricity.
- Temporary Electrical Installations.
- Artificial Respiration and Electrical Burns

The Lectures will be supported by PPT, CD film shows and discussions
